Press Release

## JENOPTIK Optical Systems, Inc. formed by merger of leading optics companies

Release date: 6 July 2008

Coastal Optical Systems and Liebmann Optical Company are pleased to announce effective July 1<sup>st</sup>, 2009 these JENOPTIK subsidiaries have merged to form

### **JENOPTIK Optical Systems, Inc.**

The strength of the new company (70,000 square feet of optical manufacturing, 100 employees) and breadth of the product offerings elevate **JENOPTIK Optical Systems, Inc.** to best in class in North America.

JENOPTIK acquired Liebmann in 1999. Since the acquisition of Coastal in 2002, the two subsidiaries have leveraged the considerable capabilities of Liebmann Optical Company in optical component manufacturing with the systems expertise of Coastal into a broad range of optical solutions meeting our customer's demanding requirements.

Jenoptik Optical Systems, Inc. will deliver services ranging from design & manufacture of prototype optical assemblies to high volume component manufacturing for applications ranging from UV through LWIR. Primary markets are life science research, defense, semiconductor manufacturing, digital projection, optical metrology and astronomical research but in fact are any that require custom precision optics.

**JENOPTIK Optical Systems, Inc.** is a Florida corporation, is ITAR compliant and looks forward to continuing to serve our customers in all markets from both facilities:

Optical System division

JENOPTIK Optical Systems, Inc. is a member of the Optical Systems division of the JENOPTIK group of companies. Other US subsidiaries include MEMS Optical, Inc (Huntsville, AL) specializing in diffractive and refractive microoptical components manufactured by grayscale wafer based fabrication techniques and JENOPTIK Polymer Systems, Inc. (Rochester, NY) specializing in high volume molded polymer optics.
